**INTELLIGENT DOCUMENT TRACKING**

DocuTrack3000 is an intelligent document tracking and management software. It offers complete solution for document management, applies both to softcopy documents and hardcopy documents. RFID technology is used to keep track of hardcopy documents. RFID offers detailed tracking functionality with our DocuTrack3000 Desktop Engine software. Keep check on documents has been so easy.

**PROJECT'S DOCUMENT MANAGEMENT**

User can upload and download document from the centralized server at a fast speed. All documents will be categorized based on user. Document sharing helps users to collaborate within organization. Sharing of document proves to provide proper tracking on modification status to a document. Ultimately, document sharing helps to minimize time loss due to document management.

**FILE SECURITY & APPROVAL**

Built-in security features is critical to ensure the integrity of the documents. Each document has its own security settings such as access rights and usage rights. Only the right user can view and modify the document. On top of this, approval function enabled workflow management within a team. Email will be sent out automatically to request for approval and notifications on approved documents.

**EASY SHARING ON RFID LIBRARY**

Hardcopy document such as files, books, paper and many others are also very important to business. In DocuTrack, we provide RFID (Radio Frequency Identification) based tracking. We monitor movement of document using Radio Frequency technology. Each document can be tracked to the rightful owner, the borrower, time of borrowing and so on.
